EXECUTIVE FUNCTION AT HOME (PART 4 OF 4)

by Ashley Eaton, M.A.T.

As children get older the mental demands on them increase exponentially. Executive function skills are essentially “the management system of the brain” (Belsky). Skills such as planning, organization, task initiation, time management and regulating emotions are all part of executive function. It is important for children to not only learn these skills, but be able to generalize them, or use them across settings, such as at school and home.

A WORD FROM THE OWNER

Dear Parents,

Hi! I'm proud of your children's hard work this year. I've heard good things about their progress at school and improved report cards.

Though this is the last newsletter for the Spring Semester, keep your children sharp over the summer by having them read and practice math. You can download free summer practice calendars on our website below. Let me know if you want your child to attend summer sessions, too. You'll still receive our monthly newsletter, so look out for Fall Semester Pre-Registration dates, so that you can sign up. Have a great summer!

God Bless!
Miss Horton

DAILY ROUTINE

REINFORCING YOUR CHILD'S EDUCATION AT HOME

by Summer Stanley

As much time as children spend in school, it can be easy to assume that they get all the education they need inside those walls. But the truth is that kids are so overloaded with information at school that much of what they learn can slip through the cracks if not reinforced at home and in the community. As a parent, you have
